OVERHEAT PROTECTION

The overheat protection device can ensure the bicycle light in a good running temperature condition, so that to protect the LEDs without burning case. If the light is in high temperature during operation, it will dim the light output.

CHARGING

- Power off.
- Plug USB cable to USB port.
- Unplug after fully charged.

* Do not charge over 5V.
* Keep away from flammable objects while charging.

BATTERY CAPACITY AND CHARGING INDICATOR
